

DEGAUSSER MD103

ONE BUTTON FOR FAST, SAFE AND CLEAN DATA ERASURE

New security and privacy mandates require complete erasure of media containing customer information and strategic data before disposal of media. **Degaussing is the most reliable and quickest way of meeting these requirements.**

- ✔ Mediaeraser MD103 features new technology which provides **the fastest, most superior erasure of magnetic media today.**
- ✔ Mediaeraser MD103 is **designed to permanently remove all data and formatting** from today's hard drives and data tapes. In just 30 seconds Mediaeraser MD103 will automatically erase all formats and sizes of hard drives including SCSI and IDE in addition to DLT, SDLT, 8mm, AIT, diskettes and other formats of magnetic media. The MD 103 doesn't rely on software, therefore it will erase all operating systems. In addition, degaussing is the only way of erasing hard drives that are not functioning.
- ✔ Mediaeraser MD103 degausser meets the Electromagnetic Compatibility (EMC) Standards: **EU Council Directive 89/336/EEC.**
- ✔ Mediaeraser MD 103 is designed to **work in office environments as well as in professional data utilization posts.** Simple operation allows non-technical operators to erase all formats of media without the confusion of using complicated adapters. **The light and compact body** ensures that the utilization process unfolds in a **comfortable way.**
- ✔ Mediaeraser MD 103 is a **result of many years experience in the IT security market** and is the answer to regulatory compliance and data security in organizations.
- ✔ Media - producer of Mediaeraser MD 103 - invites all companies concerned with IT security solutions to **take advantage of a unique opportunity to cooperate with us** in promoting this outstanding product. We offer comprehensive Mediaeraser MD 103 technical and marketing support including attractive discounts, demo versions, marketing materials, help desk, after sales service, etc.
