

OmniClone® 5Xi

OmniClone® 5Xi Production Grade Hard Drive Duplication System

The Logicube® OmniClone® 5Xi is a high-speed production-grade hard drive duplication system. This five-target system supports UDMA-5 transfer speeds and clones SATA and IDE drives. Advanced software options provide a variety of cloning methods including MasterManager™ and Selective Partitions™. Easy to use the OmniClone 5Xi has quality and reliability built-in for all your large volume duplication tasks.

■ Five target hard drive duplication

■ Fast cloning at over 4GB/min

■ Clones all operating systems

FEATURES

- Production-grade, high-speed hard drive duplication of SATA and IDE drives
- Clones all operating systems including Windows Vista and Windows 7, Mac®, Linux, Unix®, Sun®, DOS, OS2
- Supports Solid State Drives
- Supports eSATA and microSATA drives with optional cables
- Master and target drives can be of different sizes, brands and models
- Adjusts all target drive structure to ensure target will boot. NTFS CleverCopy™ software option is required for NTFS file system applications.
- Perforated drive trays with special fans provide active cooling
- Integrated USB port connects to the master drive position to quickly partition and build new master drives
- Built-in CompactFlash card provides easy software updates
- Easy and intuitive navigation with a Paper White Fine touch screen allows users to edit volume labels, passwords, and store pre-defined settings
- Advanced software includes MirrorCopy™ – provides a straight bit-for-bit clone; DOS and FAT 16/32 CleverCopy™ – copies data areas only, skips blank sectors.
- Tri-Color visual light stack and alarm buzzer provides easy status monitoring
- One-year standard warranty parts and labor

Logicube®

OmniClone® 5Xi

OPTIONS

- 1.8", 2.5" and ZIF adapters
- OmniPort provides immediate access to USB flash drives
- CompactFlash™ adapter for flash media
- eSATA & microSATA Cables
- Combo Drive Station supports Compact Flash cards, 1.8" and 2.5" media
- Verification Station™ allows the user to clone and then verify the exact replication of the source drive
- NTFS CleverCopy™ copies data areas only; skips blank sectors; scales partitions to fit target; supports Windows NT, 2000, XP, Vista and 7
- MasterManager™ Creates a multiple partition (up to 24) master drive by adding partitions from different sources
- Selective Partitions™ Select one, some, or all partitions for endless combinations
- Diagnostics™ Wipe a drive to DoD specifications, scan a drive for bad sectors, and recover data from bad or "weak" sectors
- Database software program enables the user to scan and log hard drive cloning sessions. Barcode reader included
- Serial Remote Link provides the ability to receive commands from a PC. Allows the user to control the OmniClone from a remote terminal. Includes a 3 meter serial link cable

IN THE BOX

- All OmniClone Xi systems include a users' manual and a set of data and power cables, USB cable and power cord. The OmniClone 5Xi and 10Xi includes the visual light stack and alarm buzzer

(1) Printer Port, (2) CompactFlash™, (3) USB, (4) Light stack, (5) forced air exit, (6) forced air entrance

The optional Combo Drive Station supports CF Flash Card, PCMCIA Card, 1.8" and 2.5" drives

SPECIFICATIONS

Power Requirements	Power Consumption	Operating Temperature	Relative Humidity	Net Weight	Dimensions	Agency Approvals
350W	20W w/o drives	5-60° C	10%-80%	11 lbs	17.5 W x 17D x 3.3"H	RoHs Compliant
