

OmniWIPE™-2

The next generation of OmniWIPE™ now features built-in support for SATA and faster wiping speed!

The OmniWIPE™-2 from Logicube® is the ideal way to quickly wipe hard drives. This powerful solution sanitizes multiple IDE and SATA drives simultaneously at over 4GB/min. A 3-target system, the OmniWIPE-2 handles different makes, models and sizes, providing wipes that conform up to Department of Defense specifications. Cost-effective, compact and easy to use this reliable solution is perfect for all your drive-wiping needs.

Built-in support for SATA and IDE drives

Sanitize multiple drives at over 4GB/min
